## Lathe Programmer

Montgomery, IL

Full-time

**We are currently seeking a Lathe Programmer with MasterCam Programming experience.**

- Our business has a concentration on lathe programming. The desired candidate will create new CNC programs as well as modify/update existing CNC programs. The ideal candidate will have 2 to 3 years of experience, posting and programing from 2D models/drawings.
- Must be able to program using MasterCam or similar programming software.
- Must have the ability to read G&M Code
- The candidate will have a sound understanding of Lathe and Mill cutting tools, with an emphasis on lathe tooling.
- Must have experience in setting up and running CNC lathe and Mill machines
- May occasionally perform other work for which qualified to meet production needs
- Good communication and interpersonal skills are desired in a team environment with a focus on continuous improvement.
- We offer a clean and temperature controlled work environment with an emphasis on safe work practices.

If you are looking for a challenging career and are planning for your future, we offer a 401K
